

Prerequisites for admission to the MS in Kinesiology Non-Thesis track

The following courses are required for admission to the Non-Thesis MS in Kinesiology:
Separate introductory courses in Anatomy and Physiology, or a combined introduction to Anatomy/Physiology course

Applicants who have not completed an undergraduate degree in Kinesiology can be admitted to the graduate program, but must complete a breadth requirement of a minimum of six credits at the undergraduate level from at least two different tracks within the Kinesiology program.

Physiology of Exercise

Biomechanics

Exercise Psychology

Motor Control and Behavior

Exercise Epidemiology

Deficiencies:

Students lacking certain prerequisite courses may still be considered for admission to the Kinesiology graduate program. These students are said to be admitted with “deficiencies”, and these deficiencies must be made up as a part of the student’s graduate coursework. Students admitted with deficiencies retain eligibility for financial aid consideration.
